INTRODUCTION

As the college has been making significant contributions in the field of Environmental conservation. It is required that more attention is paid to to management of waste inside the campus.

This policy envisages to ensuring the responsibilities of the College in creating a society free of waste. This policy is a document that will facilities faculty and students to act as responsible citizens of the society in terms of production of waste. Waste segregation and disposal.

VISION

Our policy visualizes a community that is conscious of the consequences of the deterioration of environment through waste mismanagement and thus strives to create clean environs and a resource efficient community in which waste is managed in an environment friendly manner.

OBJECTIVES

- Create consciousness among faculty and students about the ways in which waste is generated and the means by which they can reduce waste generation.
- Encouraging them to adopt appropriate technologies for processing and managing all types of waste.
- Appropriate training to segregate hazardous and non-hazardous waste and dispose of them using appropriate method without creating environmental degradation.

- Appropriate training to segregate hazardous and non-hazardous waste and dispose of them using appropriate method without creating environmental degradation.
- Maintain the plastic-free campus.

SOLID WASTE MANAGEMENT

Staff and students are instructed to reduce generating waste as much as possible. Colour-coded dust bins are installed in the campus as an attempt towards segregation of different types of wastes. Trash bins of yellow, blue and black color are used for dumping of paper waste, food waste and plastic waste respectively. Precautions need to be taken not to bring disposables such as polythene bags, PET bottles, paper plates or cups to campus.

SMC dumper is installed at a particular place in the campus with adequate sanitation measures and periodically SMC disposal team lifts this for final disposal.

LIQUID WASTE MANAGEMENT

Liquid waste generated in the bath rooms, toilets, laboratories is passed through drains and reaches the septic tanks of college. Canteen wastewater is also managed through soakage pits which are cleared periodically of the waste and the rest of the water shall pass into the conventional drain.

E-WASTE MANAGEMENT

College is in the process setting up an e-waste management plan by tying up with some agency that can responsibly carry out the disposal of e-waste generated in the college. It is pertinent to mention here that different types of e-wastes like monitors, cables, batteries, etc. are generated in the campus that need to be safely disposed.

The following measures shall be in place for overall waste reduction in the campus.

1. Items like paper, plastic waste including PET bottles shall be sold to recycling agents thus generating some income for outreach activities.
2. Ballpoint pens shall be reused by inserting new refills.
3. Recycling of fallen leaves, dead plants and wastes from tree pruning by dumping in compost pit.
4. College is making every possible effort to switch over to paperless mode to achieve reduction in generation of paper waste e-library, e-office.
